

2022 Winter/Spring MCO Digital Accessibility Series

Join us for the 2022 Winter/Spring series of MCO Digital Accessibility sessions where colleges share how they are addressing digital accessibility at their institution.

These sessions are open to anyone from community colleges who want to learn more about digital accessibility practices and initiatives at other institutions.

Those attending are welcome to share their experiences from an institutional, support, or faculty perspective on how they have made digital content, or education in general, more accessible to all students.

Sessions are Fridays from 12noon – 1pm

February 18, 2022

Digital Accessibility in Course Design and Development: A Conversation

This presentation will highlight the role accessibility plays within the course design and development processes at two different institutions.

Denise Dejonghe, Macomb CC
Jason Kane, Schoolcraft College
